

GEOGRAPHIC INFORMATION SYSTEMS

(G.I.S.)

This short-term departmental certificate in GIS is designed to provide opportunities to learn the fundamentals of computerized mapping and data analysis. The courses serve as both a career-readiness certificate leading to employment or continued study leading to a more advanced certificate or degree. For further information about this program, contact the Geography Department at extension 313.

All courses from the following (7 units):

GEG 134/CIS 135A Introduction to Geographic Information Systems
GEG 135/CIS 135B Intermediate Geographic Information Systems
