**Subject:** Coronavirus Update #2

Hello all,

With the impacts of the coronavirus (COVID-19) continuing to spread as more cases are identified in California, Lake Tahoe Community College is taking the preventive measure of suspending all class field trips, program trips, and student club travel outside of the college service area for the remainder of the Winter quarter, which ends Friday, March 27. Decisions about Spring quarter events will be made at a later time as the situation evolves.

This decision was made out of an abundance of caution for our students. It is a precautionary measure, and it will likely not be the only measure LTCC takes to protect students and staff as the college respond to developing conditions. Currently, there are **no confirmed cases of COVID-19 in El Dorado County**.

LTCC is conducting an ongoing review of our travel policies as new information about the virus comes in. Any updates will be communicated via internal emails to staff and faculty, direct-to-student emails, the college's website ([www.ltcc.edu/coronavirus](http://www.ltcc.edu/coronavirus)), and via social media accounts and the Coyote Corner app (download for free at [www.ltcc.campusapp.com](http://www.ltcc.campusapp.com)).

Thanks,

LTCC Risk Management Team
