How the Graduate Rate was calculation on the Dept of Education's Scorecard:

Graduation Rate

Graduation rate is presented differently for degree granting and non-degree granting schools.

- The graduation rate for degree granting schools is the proportion of entering students that graduated at this school within 8 years of entry, regardless of their full-time/part-time status or prior postsecondary experience. Graduation is measured 8 years after entry, irrespective of the award sought or award obtained.
- The graduation rate for non-degree granting schools is the proportion of full-time, first-time students that have graduated at the same school where they started college within 200% of normal program completion time (e.g., within 8 years for a bachelor's degree, or within 18 months for a 9-month certificate).
