

Analysis/Solution Mindset

What it Means

Understanding Different Points of View Considering different points of view. Trying to understand why information is presented the way it is.	Understanding the Context of Problems Seeing problems and needs in society, the community, or workplace. Looking at the bigger picture when finding a way to solve a problem.
Connecting Information with Critical Thinking Seeing themes or patterns in data. Connecting information from different subject areas. Using critical thinking skills.	Thinking About Multiple Solutions Taking time to think about different ways of solving problems. Testing out ideas to find the one that is best.
